## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 2 and 5-11 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The applicant's independent claims, claims 9 and 11, have several similarities as well as differences with the Kirk et al. (US 5724707) patent. Included in Kirk et al. as well as in Applicant's invention is the following: a fastening system comprising of a plurality of fastening straps disposed on an object to be fastened, each fastening strap having a free end; a plurality of clothing loops disposed on the article in a row and column arrangement next to and below one another, each clothing loop having a width; a plurality of buckles, each buckle disposed on a respective fastening strap below an upper fastening region; and a plurality of pocket loops disposed next to one another on the article in a lower region of a contact surface of the object to be attached, each pocket loop associated with a respective one of said plurality of fastening straps. However, Kirk et al. does not disclose a plurality of gripper elements where each gripper element has a hook disposed on the free end of a respective fastening strap and where each hook has a hook end and an engagement projection disposed on the hook end, where the hook has a hook length corresponding approximately to the width of the clothing loop. Also not disposed in Kirk et al. is that each gripper element has a plurality of gripper depressions. Previous patents issued have included a hook on the end of a fastener strap on somewhat similar devices, but the hooks do not fit the limitation of

being the width of the clothing loop. Thus, there is motivation as well as structural issues that are not met.

None of the other prior art references whether taken alone or used in combination cure the deficiencies of Kirk et al. Thus, the prior art as a whole made of record does not disclose or suggest the structural arrangement or the combination of structure set forth in Applicant's claims. As a result, the Examiner believes Applicant's claims as presented are patentably distinct from the prior art of record and the general prior art pertaining to fastener systems attached to articles of clothing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
